

DataSitr

Saudi AI privacy gateway

داتا ستر — بوابة خصوصية سعودية للذكاء الاصطناعي

Use any AI model. Raw Saudi personal data stays on Saudi-hosted paths unless tenant policy authorizes an external route. Compliance evidence is built in for procurement, security, and DPO review.

Legal entity	Data Sitr Establishment
Commercial Registration	4030483372
Unified National Number	7030618388
Tax Identification	3146697241
Location	Jeddah, Kingdom of Saudi Arabia · Makkah Province
Founder / DPO	Sulaiman Husam Abonami · NPDR DPO #3260005651
NDGP posture	LR-25-000018 — registered, not licensed
SDAIA posture	AE-26-000237 — accreditation in progress, not awarded

Three things we do

Automatic privacy routing

DataSitr catches personal data before AI requests leave the configured route, then tokenizes, blocks, or keeps processing in-Kingdom.

Saudi PII detection

Saudi IDs, Iqama, phone, IBAN, Arabic names, addresses, and sensitive-data cues are detected with Saudi recognizers plus Arabic NER.

Reviewable evidence

Control matrix, signed reviewer pack, dated HA proof, and benchmark snapshots are packaged for buyer diligence.

Signed evidence	2026-05-04 customer-route cutover bundle: evidence/ha/alibaba-live-2026-05-04T01:17:03Z/. It proves public DNS, TLS, ACK route, API contract checks, and a 4-hour customer-route soak.
Detector signal	Pipeline F1 0.93 (Wojood test, 357 sentences). This is a dated in-repo benchmark, not an external audit or production-wide guarantee.
Boundary	Not yet claimed: NDGP license, awarded SDAIA accreditation, SOC 2 report, ISO 27001 audit outcome, independent pen-test attestation, automatic data-tier failover, cross-cloud database replication, HSM custody, or full-vault verification.
Contact	Founder / DPO: Sulaiman Husam Abonami · dpo@datasitr.com · phone shared during direct operator outreach.
